

Flying Fire Trucks – The History of Aerial Fire Fighting in Canada

A new aviation book by Trevor McTavish

Update #13

October 2004

This month my fire bombing book was put on the back burner as I used the month to give my local plastic model club's website a complete facelift. I guess it was due, since I hadn't updated it in nearly a year.

I've also been busy creating a webpage for myself that includes information on my hobbies, projects (like this book) and flying. It should be up and running for the new year.

November 2004

My fiancé and I took two weeks off for a Caribbean cruise, which of course, disrupted my work yet again. I did however make contact with some people from Air Spray and the Flying Firemen while incorporating several editorial changes to my manuscript.
